hello, i am writing this to let you know how vital it is for over the road drivers to be able to recieve satellite radio . my husband drives a truck and there are times when he is in cali. and nevada that he has to drive in the desert and he can not pick up any radio stations sometimes for days . he also has loads going thru the mountains and he needs to be able to get weather reports and updates on severe storms headed his way and most of the time he cannot pick up radio stations that can keep him informed not only on weather but on important news i think it is very unfair for anyone to take this away from them iam handicapped and it even makes me feel more secure knowing that if a tornado or snow storm is in the area he is driving in he has a better chance of getting to safe area . that is a very important part of satellite radio it gives them information they could not get else where thank you for reading my email and i hope it helps to keep satellite radio available for truckers and other drivers who need it
